Lead acetate is also known as "sugar of lead".

$Pb(C_2H_3O_2)_2$

Romans used it as a sweetener, which was as good an idea as it sounds... (It also might have killed Beethoven.)

The average cumulus cloud, if completely squeezed out, has enough water to fill an Olympic-sized pool $\frac{1}{5}$ of the way up.

*It is more civilized to make fun of life, than to complain about it.

- Seneca

Thomas Vose, 5/2/22
